SUMMARY

Full-Stack Software Engineer with **nearly 5 years of professional experience** building scalable, secure web applications across **responsive frontend interfaces, backend APIs, and database systems**. Experienced with **React.js, Next.js, TypeScript, FastAPI, PostgreSQL, and Redis**, delivering agentic AI applications, real-time platforms, authentication workflows, and production-ready features. Strong in API and database design, performance, testing, debugging, and end-to-end product ownership.

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend	React.js, Next.js, Redux Toolkit, TanStack Query, Zustand, Tailwind CSS, Styled Components, shadcn/ui
Backend	FastAPI, SQLAlchemy, Alembic, REST APIs, GraphQL, JWT Authentication, Authorization, RBAC
Databases & Real-Time	PostgreSQL, Redis, WebSockets, SSE, Redis Pub/Sub, Database Migrations, Caching, Rate Limiting
Architecture & Quality	API Design, Database Design, SSR, SSG, React Server Components, Core Web Vitals, WCAG Accessibility
Testing & Tooling	Unit Testing, Integration Testing, API Testing, E2E Testing, pytest, Jest, React Testing Library, Playwright, GitHub Actions, CI/CD, Storybook, Webpack
AI	Vercel AI SDK, AI Elements, Prompt Engineering

EXPERIENCE

Velotio Technologies, Software Engineer | Remote

May 2025 - Present

- Delivered an **agentic chatbot platform** by building **FastAPI services, SSE-based streaming, and an adaptive React interface**, enabling users to follow live tool calls, LLM actions, and multi-step reasoning within a unified experience.
- Improved visibility into **voice bot and chatbot workflows** by developing reusable UI components and authenticated backend APIs for OpenSearch results, guardrail feedback, evaluation outcomes, and PostgreSQL-backed datasets, reducing manual investigation across AI workflows.
- Led end-to-end delivery of a **job portal and careers platform** using **Next.js, FastAPI, PostgreSQL, SQLAlchemy, and Alembic**, shipping responsive candidate journeys, authenticated APIs, database migrations, and SEO-optimized pages across the platform.

Gigmo Solutions Pvt Ltd, Software Development Engineer I (SDE-I) | Gurugram, India

June 2023 - April 2025

- Improved payment-status visibility by leading development of a **real-time payments module** with **React.js, FastAPI, PostgreSQL, and SSE**, delivering backend APIs, transaction workflows, and live updates across the payment lifecycle.
- Enabled low-latency customer communication by building a **WebSocket-based chat system** with message persistence, authentication, and **role-based access control**, securing workflows across frontend and backend services.
- Improved the relevance of customer-support suggestions by integrating **LLM model APIs, prompt workflows, and backend services** into a recommendation system that generated context-aware responses for support interactions.

Wipro Technologies, Project Engineer | Remote

Sept 2021 - May 2023

- Increased average user session duration by **2 minutes** by building reusable React components and integrating Redux across enterprise applications, improving interface consistency and usability.
- Reduced page-load times by **15%** through code optimization, lazy loading, and frontend performance improvements while achieving **WCAG accessibility compliance**.
- Delivered responsive, pixel-accurate interfaces from complex wireframes using **React.js, Tailwind CSS, and Styled Components**, ensuring consistent behavior across browsers and devices.

PROJECTS

QuickPad – Privacy-Focused Collaborative Notepad | GitHub | Live Demo

May 2026 – Present

- Built and deployed a **full-stack collaborative notepad** using **Next.js, FastAPI, PostgreSQL, Redis, and CodeMirror**, enabling no-signup note creation, URL-based sharing, exports, and persistent autosave.
- Designed a scalable **real-time collaboration architecture** with **Yjs, WebSockets, and Redis Pub/Sub**, supporting conflict-free editing, automatic reconnection, and synchronization across multiple application instances.
- Secured private and read-only notes with **Argon2 password hashing, JWT-based access, and rate limiting**, protecting shared content and restricted workflows.

FormForge – Dynamic Form Builder SaaS | GitHub | Live Demo

Oct 2025 – Present

- Built a production-oriented **form-builder SaaS** using **Next.js, FastAPI, PostgreSQL, and Redis**, delivering drag-and-drop editing, conditional logic, validation, multi-step flows, live preview, autosave, and undo/redo.
- Shipped secure publishing and response workflows with **shareable and embeddable forms, password protection, expiry controls, CSV export, and analytics dashboards**, deployed using **Vercel and Neon**.

EDUCATION

Amity University, B.Tech - CSE | Gurugram, India

Aug 2017 - Jun 2021
